TECHNOLOGY

### Pad Pressure (%) vs. Time

**SteadyOne™** uses advanced fluid drive technology to maintain constant pad pressure and produce more consistent results. Unlike other machines using spring mechanisms that vary when a metal coil compresses or extends, **SteadyOne™** automatically adjusts the deck as the pad wears to apply the same pad pressure throughout the burnishing operation. Floor care professionals can now get the same **one-pass** results today ... and tomorrow.

CE approved

The PE300BU keeps 88% of its original pad pressure after 3 hours of burnishing.
