

## **20 GALLON WET DRY VACUUM**

**20 Gallon Wet & Dry Vacuum • 110" Water Lift Vac Motor**

**• 24" Front Mount Squeegee Assembly • 50' Cord**

**• Special Tip Pour Feature • Warranty**

*Contractor Tool Kit Includes: Wet p/u Tool, Dry p/u Tool, Crevice Tool,  
Upholstery Tool, Dusting Brush,*

# 20 GALLON WET DRY VACUUM SAFETY INSTRUCTIONS

## Description:

Each Renown wet vacuum features an automatic float shut off system designed to keep water and foam out of the vacuum motor. The unique tip and pour design makes draining into tall slop sinks or toilets easy to do.

The large 1.33 HP vacuum motor provides superior suction resulting in dry, readily usable floors. The dry filter bag element converts this tip and pour vacuum into a dry vacuum for the appropriate applications. A drain hose is attached to the front of the machine for convenient draining. A 24-inch front mounted squeegee and contractor tool kit is included with each machine.

## Features/Benefits:

**Tip & Pour Tank:** 20-gallon blow molded tank has 12-year warranty. Tank will not rust. Removable tip & pour drain allows user to easily empty tank.

**Hose Drain:** 1" flexible drain hose is convenient for facilities with floor surface drains.

**Front Mount Squeegee:** 24" front mount squeegee assembly is standard with an optional 30" squeegee assembly.

**Transport Wheels:** Non-marking gray rubber wheels will not mark floors.

**Modular Vacuum Motor:** No tools needed to remove or replace vacuum head. Automatic float shut off prevents motor water damage.

**Crush Proof Vacuum Hose:** 9' flexible hose will not crush if stepped on.

**Micro Filter:** Dry filter keeps dirt and dust from exiting vacuum when used in dry applications. Wet (blue mesh) filter prevents foam from entering vacuum motor.

**Warranty:** 3-year vac motor replacement. 12-year tank warranty against manufacturer defect.

## ! WARNING ! IMPORTANT SAFETY INSTRUCTIONS

Carefully read and understand this manual before operating this machine.

### This machine must be grounded!

Grounding provides a path of least resistance for electric current. To reduce the risk of electric shock should the machine malfunction This appliance is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. Do not remove the ground pin under any circumstances.

This machine is intended for commercial use. It is constructed for use in an indoor environment and is not intended for any other use. Use only recommended accessories.

### 1. Do not operate machine:

- Unless trained and authorized.
- Unless you have read and understand the operators manual.
- In flammable or explosive areas.
- With a damaged cord or plug.
- If not in proper operating condition.
- In outdoor areas.
- In standing water.
- Without bag/filters in place.
- With the use of extension cords.

### 2. Before operating machine:

- Make sure all safety devices are in place and operating properly.

### 3. When using machine:

- Do not run machine over cord.
- Do not pull machine by cord or plug.
- Do not pull cord around sharp edges or corners.
- Do not unplug by pulling on the cord.
- Do not stretch cord.
- Do not handle plug with wet hands.
- Keep cord away from heated surfaces.
- Do not pick up burning or smoking debris such as cigarettes, matches or hot ashes.
- Report machine damage or faulty operation immediately.

### 4. Before leaving or servicing machine:

- Turn off machine.
- Unplug cord from outlet.

### 5. When servicing machine:

- Unplug cord from outlet.
- Use manufacturer supplied or approved replacement parts.

**!** To avoid electrical shock, please replace the power cord immediately if any damage is being detected. The replacement must be performed only by an authorized person or by our customer service center.

# 20 GALLON WET DRY VACUUM OPERATING INSTRUCTIONS

## Wet Pick-Up

1. Remove vacuum head and remove the cloth or paper filter from vacuum.
2. While vacuum head is removed, check to make sure that the float shut-off is unobstructed and fully functional.
3. Add blue nylon "bubble buster" filter into tank.
4. Replace vacuum head and latch it in place.
5. Connect vacuum hose to inlet on the machine body.
6. Attach appropriate accessory tool for the job to be completed.
7. Plug power cord into a grounded outlet.

***Do not use extension cord in conjunction with the standard power cord!***

7. If using the front-mounted squeegee assembly, be sure that squeegee is attached to front of machine.
8. If using the front-mounted squeegee assembly, lower squeegee to the floor by depressing the top half of the pedal (rear of the machine) forward with your foot.
9. Turn power switch to "on" position.
10. During wet pick-up, the float shut-off will automatically prevent water from entering the recovery tank once the recovery tank is full.

***If foam develops in the recovery tank during wet vacuuming, use de-foamer chemical to help eliminate the foam. Foam will not activate the float shut-off, and therefore, may cause vacuum motor damage.***

11. To raise the squeegee assembly back to transport position, depress the bottom half of the pedal (rear of the machine) downward with your foot.

***Be sure that the handle is properly assembled on machine body prior to operating machine.***

## Dry Pick-Up

1. Remove vacuum head and be sure the cloth or paper filter is properly installed.

***Do not operate machine without bag or filter properly installed!***

2. Replace vacuum head and latch it in place.
3. Connect vacuum hose to inlet on the machine body.
4. Attach appropriate accessory tool for the job to be completed.
5. Plug power cord into a grounded outlet.

***Do not use extension cord in conjunction with the standard power cord!***

6. Turn power switch to "on" position.
7. Check the filter bag periodically to see if it is full. For optimal performance, replace bag when it is 3/4 full.

## Draining the Recovery Tank

1. Unplug machine from power outlet.
2. Transport machine to nearest floor drain or bucket.
3. Remove drain hose from front of machine. Remove ball plug from drain hose and drain the contents of the tank.
4. After the contents have drained, remove the vacuum head and rinse recovery tank with clean water.
5. Replace the ball plug on the drain hose and hang hose back on the front of the machine.

***To prevent odors in the recovery tank, remove the vacuum head when machine is not in operation to allow air to circulate.***

## Maintenance

**To keep the machine performing well for many years, please follow the following maintenance procedures.**

***Always confirm that the machine is unplugged prior to performing any maintenance or repairs.***

1. Drain and rinse recovery tank after each use.
  2. Clean float shut-off after each use.
  3. Check bag to see if full after each use. Replace bag when it is 3/4 full.
  4. Clean outside of machine with a mild cleaner.
  5. Check power cord for any damage. If any damage is detected, replace the cord immediately.
  6. Clean squeegee blades with a cloth.
- Do not use your fingers to wipe the blades!***
7. Check vacuum hose for holes and clogs.
  8. Lubricate wheels, casters and axles with a water resistant lubricant every month.
  9. Check machine for loose or missing nuts and bolts, and replace as necessary.

## Storage

1. Unplug machine from power source.
2. Store in upright position in a dry area.
3. Store with squeegee assembly off the ground.
4. Store with vacuum head off unit so that tank may breathe.
